DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. Specie 1: claims 2, 12, 20, 22 & 34 are directed to optical I/O ports;
- b. Specie 2: claims 3-4, 13-14, 23-24 & 35-36 are directed to page mode operations;
- c. Specie 3: claims 5, 15, 25 & 37 are directed to prefetchings;
- d. Specie 4: claims 6, 16, 26 & 38 are directed to cache lines operations;
- e. Specie 5: claims 7, 17, 27 & 39 are directed to stride operations;
- f. Specie 6: claims 8, 18, 28, 40 are directed to cache line skip operations;
- g. Specie 7: claims 9, 19, 29 & 41 are directed to random access memory devices; and
- h. Specie 8: claims 10, 30 & 42 are directed to decoder operations.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 11, 21 and 31-33 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention. In addition, the applicant should also include why such non-patentably distinct species do not require separate search/specific search.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher B. Shin whose telephone number is 571-272-4159. The examiner can normally be reached on 6:30-5:00 M,Tu,Th,F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey Gaffin can be reached on 571-272-4146. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
